BENCHMARKING

Benchmarking allows the Comprehensive Affordable Multifamily Retrofits (CAMR) program to monitor existing conditions, energy efficiency upgrades, and renewable energy generation for the duration of the program. As a CAMR participant, your property will be required to provide utility data to the program through the Energy Star Portfolio Manager to track pre- and post-retrofit energy consumption trends. This service is provided free of charge. If your property has an existing Energy Star Portfolio Manager account, please indicate below.

Does your property have an existing Energy Star Portfolio Manager account? Yes No

If your property does not have an existing Energy Star Portfolio Manager account, please visit the Energy Star® Portfolio Manager® website to create an account at <https://portfoliomanager.energystar.gov>. You will also need to work with LADWP and SoCalGas to request aggregated data for your property, which is required for participation in this program. Please contact us if you need assistance with setting up your account.

INTENT TO PROCEED – PROPERTY OWNER SIGNATURE

By signing below, participant agrees to use best efforts to proceed with participation and installation of energy efficiency and renewable energy measures, if applicable, in the Comprehensive Affordable Multifamily Retrofits (CAMR) program. Participant agrees to provide the CAMR Technical Assistance Provider (TA) with on-site property access to conduct an energy audit, and will work with the TA Provider to provide access to a sampling of individual dwelling units, common areas, and mechanical rooms, as requested for participant's project. Within 15 calendar days from the receipt of the program-provided energy audit report, participant agrees to conduct a follow up call or meeting with program representatives to discuss the upgrade opportunities. Following such call, participant agrees to proceed in good faith to develop and finalize a program eligible scope of work and proceed with CAMR Application Part C – Incentive Reservation and Participation Agreement form, indicating which measures participant intends to install at the property.

- *I have read, understand, and agree to comply with all terms, conditions, and requirements of the CAMR program. I understand that I am responsible for the accuracy of all project documentation submitted to LADWP.*
- *I understand by applying for an LADWP rebate and/or program, personal information provided may be subject to public disclosure by requesting parties, pursuant to the California Public Records Act.*
- *I authorize the Program to access my building's energy usage for common area meters, aggregated tenant data, and solar PV systems generation, if applicable, as described in the Eligibility Requirements and Terms and Conditions.*
